

## Wall Street Traders Look at Situation Through Bear Lenses--Local Stocks Very Dull

NEW YORK MARKET DULL, EASIER,  
WITH SENTIMENT BEARISH.  
GOSSIP OF STREET.

NEW YORK, April 7.—The lack of stability has impressed itself on some close observers of the market as one of the features of the situation at this time. Yesterday's sharp drive of the shorts resulted in net gains, lost to a large extent in the final trading, when the demand from this interest fell off. Again this morning the price list dropped fractionally, and sentiment was bearish. It has come to the time where the traders are waiting and in luck if they can scalp a few dollars, and not take desperate chances. Such a market is a poor place for the conservative investor and the chances seem rather more favorable than otherwise for a long period of depression pending the settlement of a half-score of impending matters that are hanging over the Street.

The Cincinnati Price Current, an authority in the Middle Western territory, is responsible for the statement that "the condition of crops throughout the country has rarely ever been equalled." This is an especially strong and favorable statement coming from the Cincinnati Price Current, as it has a record of nearly half a century of conservatism back of it. But the action of the grain market in the last few days is evidence that the Chicago speculators in grain have formed the same opinion and the action of cotton has been much the same. It is long time, comparatively, that the market has been so quiet. At this time it is not admitted more or less subject to drastic revision. For the time being the market is simply a speculative proposition—and the speculator who gathers a two point profit is doing well.

**Steel Trade Less Favorable.**  
The Iron Age has one or two significant things to say in its review today.

"The pig iron markets have grown quieter. In the Pittsburgh district further resales of Bessemer billets and sheet bars have been made by consumers below cost. The market for finished

material shows some irregularity, due to the increasing capacity now available in certain lines. The Steel Corporation has been definitely referred to as likely to make an announcement of increased wages and recent advances in Lake Superior iron miners' wages are expected to be forerunners of increases at other furnaces and mills. The blowing out of the only alternative as a result of the increased wage problem."

Politics and the labor situation are certainly interesting problems before the market, and the exportation of gold is yet another, when taken in consideration with the lessening reserve of the local financial institutions.

**Weak at Start.**  
At the very opening the market showed a weak, hazy tone. First sales on Copper and Smelting showed losses of 1 point on the former and 1/4 on the latter. This had some effect on the rails and they started down shortly after the tap of the bell. Union Pacific started at 10 1/2 and dropped to 10 1/4, rallying on the covering of the scalpers to 10 1/2, midway in the second hour of the afternoon the gain leaving 1/4 point net loss. Southern Pacific was off 1/4 with modest recovery. St. Paul 1/2 lower, with recovery. Reading lost a point and remained 1/4 net lower. In the industrial list small losses were sustained, but the trading has settled down to comparatively few stocks. Many stocks that have been among the leaders in the past are now traded in to the extent of 400 to 1,000 shares a day. The best strength was in stock island, preferred, where there was an advance of 1/4 points.

**Only Bull Argument.**  
About the only bull argument heard at this time is the oversold conditions.

If the Street has backed up its bearish opinions with a change in the earnestness, then the short interest must be large. But there is no trouble in borrowing securities. Minneapolis and St. Louis, the original Hawley stock, in the market at the low point for the year. Common stock of Hocking Valley is to be increased from \$11,000,000 to \$20,000,000.

## Wholesale Produce Market

## Eggs, Cheese, and Butter.

The prices given below on poultry are for wholesale lots only. Jobbers' lots are from 1/2 to 1 cent higher. Recased eggs, 1 cent higher.

Cheese—New York flats, per lb., 17 1/2c; Swiss, 20c; Brie, 22c; Camembert, 24c; Roquefort, 26c; Parmesan, 28c; Gouda, 30c; Edam, 32c; Cheddar, 34c; Colby, 36c; Monterey, 38c; Swiss, 40c; Brie, 42c; Camembert, 44c;
